

SOLARIS ENERGY SOLUTIONS DR CONGO

How will a solar hybrid mini-grid work in DRC? MIGA said CESL is developing, building and operating solar hybrid mini-grid projects through Nuru SASU in DRC to generate up to 15MW of electricity. Once completed, the project will provide electricity to around 28,000 households and businesses that ??? currently have expensive, unreliable, unsustainable, or no access to electricity. ???

Where is Nuru solar based? Nuru deployed Congo ???s first solar-based mini-grid in 2017 and has a 1.3MW solar hybrid site in Goma, the largest off-grid mini-grid in sub-Saharan Africa. Another solar hybrid site in Beni and two in the oriental province (Tadu & Faradje). Nuru was first established under the name Kivu Green Energy in August 2015.

How many people have electricity in the Democratic Republic of Congo? Goma hybrid solar project in the Democratic Republic of Congo According to the World Bank, only 19% of the DRC ???s around 102 million people have access to electricity. This translates to about 41% in urban areas and 1% in rural areas.

Why do Congolese people need electricity? According to the International Trade Administration, lack of access to modern electricity services impairs the health, education and income-generating potential of millions of Congolese people. ??? Most power generation development is directed and funded by mining companies seeking to power their facilities. ???

For context, the Democratic Republic of the Congo (DRC) is one of the least electrified countries in the world, with less than 22% of its population having access to electricity as of 2022. The ???
