

# SUBSIDIARY SEOUL HYDROPOWER ENERGY STORAGE

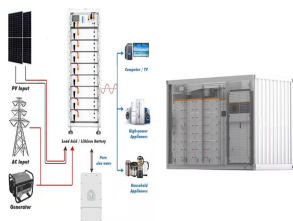

How much does a hydrogen power plant cost in South Korea? The project will be South Korea's first fuel cell hydrogen power plant. It will utilize a 900MW hydrogen plant in conjunction with 300MW of battery energy storage to support the operations of a large-scale data center. The project is estimated to cost \$1.7 billion, with the data center alone representing an \$860 million investment.

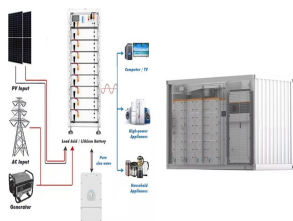

Does South Korea have a tidal power plant? Today, as the potential for conventional hydropower generation is almost fully exploited, Korea is focusing on additional hydro resources, such as tidal energy power generation. South Korea has already built the largest tidal power plant in the world at Sihwa Lake.

Who owns Gyeonggi green energy ??? fuel cell system? The Gyeonggi Green Energy ??? Fuel Cell System is owned by POSCO Energy (15%), a subsidiary of POSCO, Samchully (15%) and Korea Hydro & Nuclear Power (49%), a subsidiary of Korea Electric Power. The key application of the project is on-site heat and power generation. Contractors involved

What does 'Dangjin Green Energy Hub' mean for South Korea? South Korean state utility Korea Southeast Power and EPC firm Samsung C&T have signed a Memorandum of Understanding (MoU) with the Chungnam regional government to develop the ???Dangjin Green Energy Hub, ??? a hydrogen fuel cell power plant linked to a data center. The project will be South Korea's first fuel cell hydrogen power plant.

How much hydropower does Korea have? The hydropower fleet comprises 1,789 MW of pure hydropower and a further 4,700 MW of pumped storage. Today, as the potential for conventional hydropower generation is almost fully exploited, Korea is focusing on additional hydro resources, such as tidal energy power generation.

What are the challenges of hydropower generation in Korea? Although the Korean peninsula has a few rivers flowing west and south, which seem advantageous to hydropower generation, there are significant challenges. There are high seasonal variations in the weather and most of the rainfall occurs in the summer.

That project is with the Korea Institute of Energy Research (KIER). Due to go online in December 2024 at a site in Samcheok, it will be a 2,000kWdc/11,600kWhdc NAS battery energy storage system (BESS), and ???

The plan also called for 300MW of battery storage deployment and 2,400MW of pumped hydro energy storage (PHES) by 2030. State-owned public power company Vietnam Electricity (VE), is participating in a 50MW/50MWh ???

The project will be South Korea's first fuel cell hydrogen power plant. It will utilize a 900MW hydrogen plant and 300MW of battery energy storage to support the operations of a large-scale data center. SMRs are ???

Pumped-storage hydropower involves the use of two reservoirs at different elevations that can generate power as water moves from one to the other, passing through a turbine. REDC's Monday share price last closed at ???
