

SUNNY CENTRAL STORAGE UP BRAZIL

What is the difference between SMA Sunny central storage & SCS up-XT? With a max. output of up to 4600 kVA and system voltages up to 1500 V DC, the SMA Sunny Central Storage allows for more efficient and flexible system design for battery power plants. The SCS UP-XT versions allow a system design with higher output power and higher short-circuit current contribution.

What is SMA Sunny central storage? Grid management functions for dynamic grid support Integrated voltage supply for internal consumption and external loads With an output of up to 3960 kVA and system voltages up to 1500 V DC, the SMA Sunny Central Storage allows for more efficient and flexible system design for battery power plants.

What is Sunny Central up? As a global medium-voltage solution, the Sunny Central UP is the core of our turnkey system for PV power plants. It has been developed for worldwide use and complies with the highest international security standards. The Sunny Central UP Plug & Play System combines central inverter, transformer and storage solution in a compact unit.

What is the Sunny Central up Plug & Play system? The Sunny Central UP Plug & Play System combines central inverter, transformer and storage solution in a compact unit. In addition to facilitating transportation, the system enables fast and trouble-free project commissioning in the power plant. With the Sunny Central UP, we set new safety standards for power plants across the globe.

How long does Sunny Central up last? True 1,500 V DC technology and our improved intelligent cooling system OptiCool??? ensure smooth operation even at extreme temperatures and with a service life of 25 years. As a global medium-voltage solution, the Sunny Central UP is the core of our turnkey system for PV power plants.

SUNNY CENTRAL STORAGE UP BRAZIL

Why should you choose sunny central up? SMA???s most powerful system with an output power of up to 4,600 kVA for large-scale PV plants offers the advantage of 17% to 54% fewer inverters. With the Sunny Central UP,you benefit from significant cost reductions on transportation,installation,commissioning and service.

Der SMA Sunny Central Storage ermöglicht mit einer Leistung von bis zu 3067 kVA bei Systemspannungen von bis zu 1500 V DC eine effizientere und flexible Anlagenplanung in Speicherkraftwerken. Der Sunny Central Storage UP-XT erlaubt eine Anlagenauslegung mit höherer Ausgangsleistung und höherer Kurzschluss-Stromfertigkeit.

With an output of up to 3960 kVA and system voltages up to 1500 V DC, the SMA Sunny Central Storage allows for more efficient and flexible system design for battery power plants. A separate voltage supply and additional space are available for the installation of customer equipment. The intelligent cooling sys-

With an output of up to 3960 kVA and system voltages up to 1500 V DC, the SMA Sunny Central Storage allows for more efficient and flexible system design for battery power plants. A separate voltage supply and additional space are available for the installation of customer equipment.

The Sunny Central UP Plug & Play System combines central inverter, transformer and storage solution in a compact unit. In addition to facilitating transportation, the system enables fast and trouble-free project commissioning in the power plant.

Sunny Central Storage UP-S represents a significant advancement in battery storage inverters, delivering power conversion efficiency through its innovative use of SiC Mosfet*semiconductors. It significantly reduces thermal stress while maintaining full operational capacity, even during grid-forming services, setting a new standard for reliability and performance.
