

# SWEDEN TOP 20 SOLAR COMPANIES IN

What is the largest source of energy in Sweden? Hydropower has traditionally been one of the biggest sources of energy in Sweden, and in 2020, approximately 44.1% of Sweden's total energy generation was from hydro energy, producing approximately 72,290 Gigawatt-Hour (GWh) of electricity. This makes hydro energy the largest source of energy generation in the country.

Why are solar PV systems becoming more popular in Sweden? Several large utility-scale projects are being developed by private entities, further propelling the market's expansion. Furthermore, the soaring electricity prices in Sweden have incentivized the installation of solar PV systems for self-consumption.

Are solar PV systems a viable option for self-consumption in Sweden? Furthermore, the soaring electricity prices in Sweden have incentivized the installation of solar PV systems for self-consumption. This trend is expected to drive the demand for solar energy, providing ample opportunities for companies operating in this sector.

What is the largest source of bioenergy in Sweden? The largest source of bioenergy in Sweden is the forest. Sweden has more forest coverage than most other countries, with 63% of land cover. Bioenergy is primarily used for heating, both in private homes and in district heating, as well as for electricity production and industrial processes.

Why is the solar energy sector growing? These leading businesses have significantly contributed to the growth of the solar energy sector in the region. Notably, the ground-mounted segment has seen an increase in interest and activity since 2020, driven by both private investments and the efforts of local municipality-owned utilities.
