What is the energy supply in El Salvador? In 2019, total energy supply in El Salvador reached around 156 600 TJ (see Figure 5). That year, the renewable energy source with the largest share as part of the primary energy supply was bioenergy (19.6%), followed by hydropower (3.5%), geothermal energy (3.4%), and solar energy (1.1%) (CNE, 2020).

How much solar power does El Salvador have? From pv magazine LatAm El Salvador's energy regular, SIGET, said this week that the country's total installed PV capacity reached 633 MW by the end of 2023. The nation's total installed power generation capacity now stands at 2.99 GW, with 638 MW from hydropower. Solar accounts for about 21.1% of the nation's electricity mix.

Who is responsible for implementing El Salvador's energy policy? The primary entity for implementing this energy policy is the CEL and its subsidiary companies. These assume a strategic role in energy research, project execution and renewable energy generation, as well as maintaining a high degree of co-ordination with the CNE in the development of El Salvador's energy sector.

What are El Salvador's green energy ambitions? El Salvador's Green Energy Ambitions: 95% Renewable Projects Set to Transform the Nation in 2024. El Salvador in English El Salvador's Green Energy Ambitions: 95% Renewable Projects Set to Transform the Nation in 2024.

Who owns El Salvador's electricity? CEL is an independent, public electric utility in charge of developing, conserving, managing, and using the energy resources of El Salvador. Clean energy is generated in four hydropower plants located at different points in the Lempa River basin. ETESA is El Salvador's transmission system owner.

Solar The central region of El Salvador receives a high level of solar radiation (5.3 kWh/m2/day). Therefore photovoltaic systems are an opportunity to take advantage of the country's vast solar resources. Most solar panels are installed in government buildings, schools, and universities. The capacity of the largest photovoltaic system is 99 MW.

With a significant increase in solar and wind energy, the country's commitment to sustainable energy is evident in upcoming projects, reinforcing its role in the global shift towards a greener energy sector. El Salvador stands at the forefront of this green revolution, with 80% of its energy matrix already being generated from renewable
