

SYNERGIE SOLAIRE HONG KONG

How much does solar energy cost in Hong Kong? The potential annual solar energy output can reach 4,674 Gwh, or 10.7% of Hong Kong's energy consumption. This will reduce greenhouse gas emissions by three million tonnes. The cost of purchasing and installing sufficient PV systems will amount to HK\$30 billion. This may sound expensive, but it will only take around two to three years to pay back.

Is Hong Kong suitable for solar power generation? The city is therefore highly suitable for solar power generation. We have also found that out of the 309,000 buildings in Hong Kong, 233,000 are suitable for installing solar photovoltaic panels, with a total area amounting to 39km².

Can solar farms help Hong Kong transition to a low-carbon future? This initiative, with the full backing of the Environment and Ecology Bureau and the Environmental Protection Department (EPD), not only provides a sustainable, low-carbon energy solution but also underscores the vast potential for similar solar farms across Hong Kong, supporting the city's transition to a low-carbon future.

Is Hong Kong a good place to install solar panels? Dr Charles Wong Man-sing (left) and Dr Vivien Lu Lin Hong Kong's abundant solar energy and rooftop capacity are ideal for solar photovoltaic energy generation, a PolyU study has found. Solar panels with different energy conversion efficiency can be integrated into buildings without taking up additional land space.

How long do solar panels last in Hong Kong? With an average lifetime of 25 years, the solar panels will provide 25 years of clean electricity. In addition, the market of solar photovoltaic applications in Hong Kong is still small and costs will come down as market capacity increased.
