Le système PV, plus spécifiquement l'inverseur, est relié dans les deux directions au réseau électrique, habituellement avec un panneau de distribution sur le terrain ou un point d'entrée du service. Les systèmes PV autonomes fonctionnent indépendamment du réseau électrique. Les installations qui utilisent un système PV autonome

L'île de Pitcairn était habitée par la Prémontre par des Polynésiens. L'archéologue Marshall Weisler, chercheur de l'université de Berkeley, a découvert au début des années 1990 des structures de temple, des pictographes et des outils de pierre qui témoignent d'une civilisation ancienne. Des objets indiquent que la population locale pratiquait des échanges avec d'autres îles de
