

T60 PLANT PROTECTION DRONE

INTELLIGENT ENERGY STORAGE POWER SUPPLY

What is a T60 drone used for? The T60 is designed to excel in various operational scenarios, including farmland spraying, orchard spraying, forestry pest control, farmland spreading, orchard spreading, and aquaculture spreading. Intelligent Remote Controller The drone's intelligent remote controller features a 7-inch high-brightness display with 16% increased brightness.

What is a DJI T60 agriculture drone? DJI T60 Agriculture Drone Review The DJI T60 Agriculture Drone stands out as a powerhouse in the agricultural drone market, boasting robust features and cutting-edge technology to enhance farming efficiency. Below is a comprehensive review of its key attributes.

What is a T60 spraying system? The T60's spraying system continues the legacy of the magnetic drive impeller pump, offering corrosion resistance and a large flow rate of 18 liters per minute. The optional orchard kit enhances flow rates to 28 liters per minute, providing more uniform atomization and increased penetration for better orchard spraying results.

What features does a T60 have? The T60 excels in automatic operations with features like automatic aerial surveying, one-click operations, and intelligent obstacle avoidance. The Smart Route Planning system optimizes flight paths, ensuring efficient coverage and automatic return in case of low battery or insufficient materials. Spraying and Spreading Systems 4.0

How much can a T60 spray? The T60 is equipped with a formidable power system, capable of spraying 50 kg and spreading 60 kg of materials. The new design incorporates a pressure centrifugal nozzle and a spreading system 4.0, facilitating outstanding performance across various agricultural scenarios.

INTELLIGENT ENERGY STORAGE POWER SUPPLY

How does DJI Agras T60 work? Agras T60 uses DJI's RC Plus remote with a large 7-inch display with new backlit buttons for nighttime operations. It uses O4 transmission with the ability to work with 4G for complex operations. The drone can now undertake multi-plot operations, flying between them to continue operating.

The energy industry is a key industry in China. The development of clean energy technologies, which prioritize the transformation of traditional power into clean power, is crucial.

60 Kg Large Capacity Fertilizer Spray Agricultural Drone 50 Liters Heavy Lift Pesticide Hf T52 Agro Intelligent Agriculture Pesticide Drone Pirce for Sale. US\$10,588. We specialize in agricultural plant protection drones and plant.

The State Council, local governments, and power generation groups have all issued documents on the construction of intelligent power plants, which call for measures to improve the level of intelligence in power supply.
