ESYSUNHOME has achieved a significant milestone by successfully developing the IEEE 2030.5 cloud-grid integration, enhancing the security of the digital energy grid. To enable real-time monitoring and control of photovoltaic energy storage systems, various data transmission protocols and control agreements, including IEEE 2030.5, have been devised.

Solar efficiency is a key feature of the ESY SUNHOME, which distinguishes itself by using Lithium Iron Phosphate (LiFePO<sub>4</sub>) batteries instead of the more common Nickel Manganese Cobalt (NMC) batteries found in other brands.. LiFePO<sub>4</sub> batteries offer greater stability and a longer cycle life, making them particularly well-suited for stationary energy storage applications.

The box said "Famously from Taichung" while the shipping company address was at Keelung. Which is exact i was looking for. And it tasted just like the box I bought while visiting Taiwan. I shared with family and friends and came back to buy more lol. Yes they may be a bit pricey but so is everything else. And after all, these came from Taiwan!
