

TASHA ENERGY SRI LANKA

What are Sri Lanka's energy policies & strategies? Sri Lanka's energy policies and strategies strongly focus on developing conventional and nonconventional renewable energy sources for generating power. Promoting domestic energy resources has become one of the main policy components in Sri Lanka.

Is Sri Lanka a viable alternative energy source? Moreover, Sri Lanka has also identified the potential for wind, bioenergy, and solar as alternative energy sources in the past two decades. However, the current contribution from these three renewable sources in comparison to hydroelectricity remains significantly low.

Are Sri Lanka's renewable research activities being burdened by a lack of accurate data? Sri Lanka's overall renewable research activities are being burdened by the lack of accurate and contemporary data, especially in line with renewable energy generation and utilization.

Does Sri Lanka use wind power? Sri Lanka's history of using wind power dates back to the 3rd century B.C. and as showcased in Fig. 2 the country currently boasts over 5000 km² of windy areas that are considered to have excellent wind resource potential areas (Sri Lanka Sustainable Energy Authority Ministry of Power and Energy, 2019).

What percentage of Sri Lanka's energy source is renewable? However, as of 2018, only 39 % of Sri Lanka's energy generation capacity was harnessed through renewable energy sources. The continuous increase in electrical energy demand and the drastic increase in vehicle population over the past few years have resulted in much of its annual income being spent on purchasing fossil fuels from foreign countries.
