

THAILAND ENERGY STORAGE CERTIFICATION

Why is Thailand launching a new energy storage system? Mr. Kittikorn Lohsunthorn, Chairman of the Energy Commission, House of Parliaments, said that the signing ceremony would strengthen and drive the development of energy storage system technology in Thailand towards global energy and industry transformations, particularly in the modern automotive industry.

What is a battery energy storage system? Battery energy storage systems (BESS) are essential for buildings and renewable power generation facilities to ensure uninterrupted electricity supply. Renewable sources like solar and wind power are intermittent, and influenced by weather patterns. BESS mitigates this issue by storing electricity for future use.

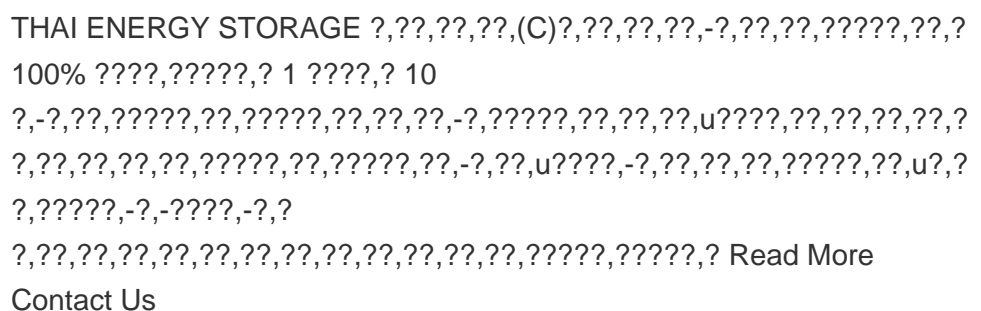

Can Bess create business opportunities in Thailand? Watcharin Boonyarit, director of solar energy development at the Department of Alternative Energy Development and Efficiency, noted the potential for BESS to create business opportunities as Thailand transitions to renewable power sources. ???We should not only import BESS but also consider new investment projects in this battery business.???

Could a sodium-ion battery be a new business opportunity in Thailand? The Federation of Thai Industries??? Renewable Energy Industry Club sees potential in sodium-ion battery (SIB) production as an alternative to lithium-ion batteries. SIBs, made from rock salt, could offer a new business opportunity given Thailand???s abundant rock salt reserves.

What is Thailand's 2024 Power Development Plan? Thailand???s 2024 power development plan (PDP) aims to increase renewable energy use, highlighting the importance of BESS alongside solar panels and wind turbines. This could create new business opportunities for entrepreneurs if prices decrease or new technologies emerge for stationary batteries.

THAILAND ENERGY STORAGE CERTIFICATION

These activities will move Thailand towards the goal of reducing the dependence of foreign technology, solving the country's energy problems, together with promoting quality standards, to create a complete value chain energy storage ???

Energy storage systems that have been tested and certified ensure reliable customers service, protect the natural environment and provide profits needed for business success. Selecting an experienced and recognized independent ???
