

# THE LATEST OSLO POLICY REGULATIONS FOR ENERGY STORAGE PROJECTS

Is there a full-scale CO2 management project in Norway? Various governments have worked to realize a full-scale project for capture, transport and storage of CO2 (CCS) in Norway. The Norwegian Parliament approved the full-scale CO2 management project in Meld. St. 33 (2019-2020) Longship - capture, transport and storage of CO2 in 2021. The Longship project will be completed in 2025.

Does Norwegian CCS project include CO2 storage? The Norwegian full scale CCS project, Longship, includes a CO2 storage with a substantial capacity beyond what is necessary for the Norwegian capture projects in Longship. Thus, other industrial actors can capture and store CO2 without investing in the development of another CO2 storage.

How does Norway support foreign projects? Norwegian support of foreign projects takes place in cooperation with other countries and through existing programs and institutions. Norway, through the Ministry of Petroleum and Energy, The Research Council of Norway and Gassnova, are represented in almost all relevant international bodies who work on CCS.

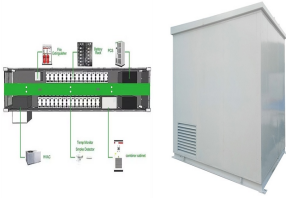

The bankability of the revenue streams of energy storage projects is a key concern for private sector funders. Revenue streams do not typically match the tenor of the financing required by an energy storage project and the ???
