

TIER 1 SOLAR UGANDA

Should solar PV devices be adopted in Uganda? Solar PV devices adoption is largely a rural phenomenon in Uganda. Policy intervention should focus on addressing affordability issues in rural areas. 1.

Introduction Access to clean energy, such as electricity, is a prerequisite for economic and sustainable development of any economy (World Bank, 2018).

Is solar energy a viable option in Uganda? The solar energy resource on average is 5.2 kWh/m²/day on horizontal surface with average daily sunshine of around 8 h throughout the year, favourable for solar electricity generation. However, adoption of solar PV systems is intractably low in Uganda (Manjeri et al., 2021, Rahut et al., 2018). This raises an important question.

What is Uganda Solar Energy Association (USEA)? The Uganda Solar Energy Association (USEA) is an in-dependent non-profit association dedicated to facilitating the growth and development of the solar energy business in Uganda.

How to promote off-grid solar in Uganda? As part of the initiatives to facilitate investment into the sector, Government of Uganda through UECCC put in place demand and supply side financing facilities to promote off-grid solar.

Why is solar PV adoption low in northern Uganda? The low levels of solar PV adoption in Northern is in line with findings of the study by Munro and Bartlett (2019), who reported that households in Northern Uganda depend on car batteries, cell torches, kerosene wick lamps and phone torches as their main source of lighting.
