

# TUNISIA STORING SOLAR POWER

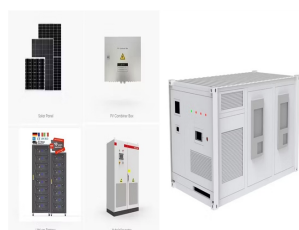

Does Tunisia have a solar power plant? First utility-scale photovoltaic plant (10 MW, in Tozeur) was commissioned in 2019 on German money. Tunisia aims to generate 30% of its electricity from renewable sources by 2030. The country currently gets only 3% to 6% of its electricity from renewable sources, mostly from wind and hydro. Solar energy capacity is at 35 megawatts (MW).

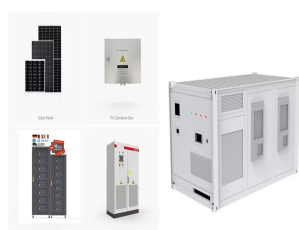

Where is the first large scale solar power plant in Tunisia? The first large scale solar power plant of a 10MW capacity, co-financed by KfW and NIF (Neighbourhood Investment Facility) and implemented by STEG, is in Tozeur. TuNur CSP project is Tunisia's most ambitious renewable energy project yet.

What is the Tunisian Solar Plan? The Tunisian Solar Plan contains 40 projects aimed at promoting solar thermal and photovoltaic energies, wind energy, as well as energy efficiency measures. The plan also incorporates the ELMED project; a 400KV submarine cable interconnecting Tunisia and Italy.

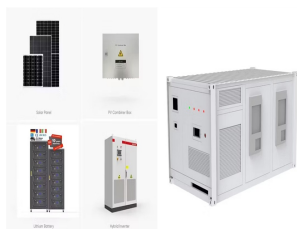

How much power does Tunisia have? The installed electricity capacity at the end of 2015 was 5,695 MW, which is expected to sharply increase to 7,500 MW by 2021 to meet the rising power demands of the industrial and domestic sectors. Needless to say, Tunisia is building additional conventional power plants and developing its solar and wind capacities to sustain economic development.

How much money is needed to implement the Tunisian Solar Program? The total investment required to implement the Tunisian Solar Program plan have been estimated at \$2.5 billion, including \$175 million from the National Fund, \$530 million from the public sector, \$1,660 million from private sector funds, and \$24 million from international cooperation.

What is TuNur project? The project consists of a 2,250 MW solar CSP (Concentrated Solar Power) plant in Sahara desert and a 2 GW HVDC (High-Voltage Direct Current) submarine cable from Tunisia to Italy. TuNur plans to use Concentrated Solar Power to generate a potential 2.5GW of electricity on 100km<sup>2</sup> of desert in South West Tunisia by 2018.

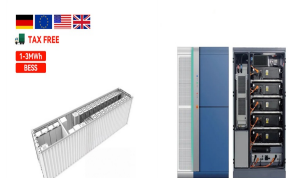

In the last decade, solar power capacity has grown tremendously to become the fastest-growing source of renewable energy in the world. Solar power directly contributes to the Tunisia's energy security and independence, as well as helping to meet rising electricity demand and CO<sub>2</sub> emission reduction goals.

Solar Power Company est une entreprise 100% Tunisienne fondée en 2013 spécialisée dans la vente, l'étude et l'installation des panneaux photovoltaïque (PV). Nous mettons à votre disposition un groupe d'installateurs qui couvrent tout le territoire tunisien afin de vous accompagner et de vous conseiller dans vos installations.

AMEA Power attains financial close on 120MW Tunisia solar project Power Technology, Sep-27-2023; "Tunisia: AfDB, AMEA Power, IFC and SEFA launch first large-scale privately-financed solar project," African Development Bank Group, September 26 2023; "Creating a Project Readiness Fund for PPPs in Tunisia". World Bank.

Tunisia is stepping up the development of its energy infrastructure with the signing of two new agreements for the construction of solar power plants in Sidi Bouzid and Tozeur. These partnerships are part of the country's long-term energy strategy, which aims to diversify its sources of electricity supply and reduce its dependence on fossil fuel imports.

A concentrated solar power project becomes economically competitive in Tunisia when the majority of the plant components such the collectors structure, the mirrors and the storage system should be manufactured locally in Tunisia to minimize the transport fees and by the way create jobs

and enhances the local industry to investigate in this field.

# TUNISIA STORING SOLAR POWER

In this context, Tunisia's strong solar energy potential, The Tunisian territory offers attractive energy resources. In addition to its potential for solar and wind, the country possesses natural reserves of oil and gas. The country has been able to rely mostly on its natural oil and gas resources to face its energy demand.

5. Integration with Solar Panels: Ensure that the storage system you choose is compatible with your existing or planned solar panel setup. Consider factors such as voltage compatibility, inverter requirements, and any necessary system integration to ensure seamless operation between the solar panels and the storage system. 6.

MWp Kairouan Solar Photovoltaic Project was the first project under the concession regime in Tunisia to reach financial close Located in Metbassta, Kairouan governorate, the project is financed by the International Finance ???

The solar park will have an annual output that will be equal to the electricity consumption of more than 700,000 inhabitants. Revenues will come from a 30-year power sales contract with Societe Tunisienne de l'Electricite et du ???

Dubai-based renewables developer and operator AMEA Power has been awarded a 200-MW solar photovoltaic (PV) project in southern Tunisia. (PPA) for the project with the government of Tunisia on Wednesday. The solar plant will be built in the Tataouine governorate. When operational, the facility is expected to generate 552,000 MWh annually

Progress at all five of the large solar photovoltaic concessions first launched in 2019 is an indication that Tunisia's renewable power sector may be moving forward despite extremely difficult political conditions. Scatec's farm-out of a stake in its two projects to Japan's Aeolus
