Where can solar power be installed in Turks & Caicos? Solar-derived power is increasing in popularity, with many private installations visible throughout the country, especially on new Turks and Caicos villa projects. Several local companies specialize in both supply and installation of alternative energy systems. The FortisTCI electricity plant on Providenciales.

Can Turks and Caicos use solar power? The Turks and Caicos Government and Fortis TCI are currently reviewing the electricity legislation to enable Turks and Caicos residents to use the solar power they produce to offset their power consumption (rather than sell everything back to Fortis at their pre-agreed rate).

Who produces electricity in Turks & Caicos? In the Turks and Caicos, all public electricity generation is run by Fortis TCI, a vertically integrated company that provides both power generation and distribution.

Could ocean thermal energy help Turks and Caicos meet its peak demand? Once wave and ocean thermal technologies are proven in the marketplace, ocean energy and ocean thermal energy conversion have potential as well. Abundant wind and solar resources, as well as the potential for other renewable sources could help Turks and Caicos meet or exceed its peak demand of 34.7 MW.

Does Turks and Caicos have a policy on energy efficiency? Turks and Caicos has few policies related to energy efficiency and renewable energy. Historically, the territory has not implemented policy mechanisms to aid in the development of clean and energy-efficient technologies.

# TURKS AND CAICOS ISLANDS UAPOW SOLAR GENERATOR

Who owns Turks & Caicos utility limited (TCU)? Turks & Caicos Utility Limited (TCU) is wholly owned by Fortis TC and provides electricity to Grand Turk and Salt Cay. In 2010, the government of Turks and Caicos contracted with a consultant to draft recommendations for exploring the use of renewable energy and energy efficiency technologies to create a more sustainable energy framework.

Why choose green solar energy in the Turks and Caicos? With power costs ranging between \$0.40 and \$0.55/kWhr and worldwide fuel costs constantly increasing, solar is an efficient, affordable and environmentally friendly.
