

TÜRKİYE'NİN ENERJİ

Will Türkiye increase wind and solar capacity by 2035? Türkiye aims to increase installed wind and solar capacity to 120,000 megawatts (MW) by 2035, requiring nearly \$80 billion investment, Turkish Energy and Natural Resources Minister Alparslan Bayraktar said on Monday.

Why does Türkiye need a nuclear power plant? Türkiye aims to add nuclear power into its energy mix in order to decrease negative environmental effects of energy production, to meet its energy demand increase as well as to reduce its energy import dependency. To this end, construction of Akkuyu nuclear power plant (NPP) is underway.

What is Türkiye's 'National Energy Plan'? Speaking at a briefing in the capital Ankara, Energy and Natural Resources Minister Fatih Donmez said Türkiye's "National Energy Plan" is projected to both support economic growth and take the country's green energy transformation to the next level.

What are Türkiye's energy policies? Bayraktar also said that Türkiye's energy policies are driven by three key goals, including the security of supply, reducing foreign energy dependence and achieving net zero emissions by 2053. The Turkish minister said that the share of renewable energy in Türkiye's total installed electricity capacity reached 59% as of September.

Does Türkiye sign a declaration to triple nuclear energy? Türkiye Signs the 'Declaration to Triple Nuclear Energy' At the 29th Conference of the Parties (COP29) of the United Nations Framework Convention on Climate Change, held in Baku, Azerbaijan, the significance of nuclear energy in achieving the 2050 net zero target was strongly emphasized.

TÜRKİYE NTS ENERGY

What is the international dimension of Türkiye's energy strategy? The fundamental elements that constitute the international dimension of Türkiye's energy strategy are: 1. To ensure the diversification of routes and resources in the supply of oil and natural gas, taking into account the increasing demand and import dependency, 2. To contribute to regional and global energy security, 3.
