processing machinery that is customized to maxim

Every Casso-Solar Technologies" Infrared Heater, Type "C+", has the  
back side of the fused quartz emitter plate specially grooved to generate  
the required characteristics demanded by the heater. Precision resistance  
coils are placed in the grooves, being surrounded on three sides by the  
fused quartz window, maximizing the energy output of

The Casso-Solar Technologies" Infrared Heater Type "FB" is a medium  
wavelength infrared heater with a woven quartz cloth surface that is  
finished with a black ceramic coating for high emissivity. The quartz face  
has the properties of being transparent to the infrared energy generated  
within the heater module, providing maximum heat
