What is a fixed adjustable photovoltaic support structure? In order to respond to the national goal of ???carbon neutralization??? and make more rational and effective use of photovoltaic resources, combined with the actual photovoltaic substation project, a fixed adjustable photovoltaic support structure design is designed.

Why is the hinge bolt located at the top of a solar panel negated? The hinge bolt located at the top of the solar panel was negated because more force will be experienced by the hinge bolt located at the base of the solar panel. The hinge bolt experiences shear due to torque caused by wind as well as shear due to vertical loads.
