

UPB ENERGY CURAÇÃO

Who is UPB energy? The experts of UPB Energy have more than 20 years of experience in design and maintenance of cogeneration and trigeneration modules. The competent team is composed of experienced engineers, technical staff and service engineers.

What is Curacao's energy policy? In 2009, Curacao developed an energy policy document, which sets out general guidance and governing principles for further study of energy issues.⁴ It suggests the goal of reducing energy consumption by 40% by 2020 and encourages the investigation of combining wind power with storage to provide 100% of the island's energy needs.

How much does energy cost in Curacao? Energy Snapshot Curacao This profile provides a snapshot of the energy landscape of Curacao, an autonomous member of the Kingdom of the Netherlands located on the coast of Venezuela. Curacao's utility rates are approximately \$0.26 per kilowatt-hour (kWh), below the Caribbean regional average of \$0.33/kWh.

What services does UPB offer? UPB also offers cogeneration and trigeneration module servicing according to the highest standards. The cogeneration and trigeneration station production facility is located in Liepaja, Latvia and is the only production site of this type in the Baltics.

Does Curacao need electricity? Like many island nations, Curacao is highly dependent on imported fossil fuels (more than 95% of the island's electricity is generated using petroleum-based fuels), leaving it vulnerable to global oil price fluctuations that directly impact the cost of electricity.

UPB ENERGY CURAÃ§AO

Why does Curacao use wind energy? Curacao's long history with wind energy has provided it with valuable experience in integrating variable energy resources into the electrical system while also demonstrating the value of avoiding petroleum-based electricity generation.

Technical Director at UPB Energy ? Experienced Project Manager skilled in Biomass Power Plants and Boiler houses, and gas engine based co-generation plants, with a Master of Heat and Power engineering and Business Management focused in Industrial Engineering and Management. ? Experience: UPB energy ? Education: Rigas Tehniska Universitate ? Location: Riga ? 171 ???

The specialists of UPB Energy continuously work on developing new energy solutions, as well as on improving the functionality of existing solutions. Energy Solutions for Your Business. Due to UPB Energy's long-term experience in the energy sector and close cooperation with other companies of the UPB Group, the specialists and engineers of UPB

In one hour, the biomass cogeneration plant is able to produce 12 MW of thermal energy and 2.3 MW of electrical energy. The produced thermal energy is used in the city's centralised heating system. The thermal energy from woodchips is enough to ???
