

VIETNAM NICHE ENERGY

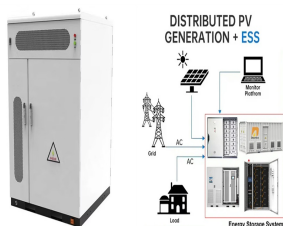

Will Vietnam build a better energy future? Building a cheaper, cleaner, and more secure energy future for Vietnam will not happen overnight. Other markets further along in development of renewable power greatly benefited from the support of the government.

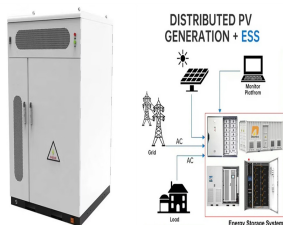

Does Vietnam have solar energy? Solar energy Vietnam boasts significant solar energy potential due to its proximity to the equator and the presence of arid and sunny areas, especially in the south-central provinces. Solar radiation intensity ranges from 897 to 2108 kWh/m²/year, equivalent to 2.46 to 5.77 kWh/m²/day.

What are the limitations of research in Vietnam's energy sector? Limitations of the research: The research is constrained by its reliance on materials from government planning until 2025 in Vietnam's energy sector, resulting in limited information for forecasting. The available data sources, comprising open data and background research information, introduce potential errors in the research forecast estimates.

How will Vietnam's energy sector change between 2023 and 2050? Vietnam's energy sector will undergo major changes between 2023 and 2050. Vietnam will not build new coal-fired power plants after 2030 to ensure it reduces carbon emissions and meets commitments made at COP 26 (2021 United Nations Climate Change Conference).

Envision Energy Singapore, a subsidiary of China-based Envision Energy, has announced plans to launch construction of the 300 MW Envision Nam Po wind farm in Dien Bien, Vietnam, by June 2025. The project will span across 105 hectares and is being developed at an investment of USD420 million. Further, it aims to operate 60 turbines and link to
