

VOLVO BESS SWITZERLAND

Why should you choose a Volvo Penta Bess subsystem? Volvo Penta's BESS subsystems provide you with an energy-dense solution with an advantageous C-rate. This helps ensure efficient energy storage with rapid charge and discharge capabilities, which is ideal for applications where energy reliability and swift power delivery are crucial.

Why is Volvo launching a Bess solution? The company said the launch of a BESS solution is a strategic move to supplement its power generation business and tap into a new segment. A spokesperson for Volvo Group told Energy-Storage.news that the product is a sub-system rather than a full containerised solution.

Why should you choose Volvo energy? At Volvo Energy, we aim to accelerate and ease the shift to electrification. We will offer a Battery Energy Storage System (BESS) that provides a reliable supply of renewable energy and reduces costs. We also work on robust on-site and en-route charging solutions to ensure consistent, dependable energy access.

What is a Bess subsystem? Volvo Penta's energy-dense BESS subsystems are purpose-built to enable OEMs to build transportable, high-performance BESS solutions supporting the energy transition in industries where energy density is essential.
