

WHERE CAN I STORE ELECTRICITY IN ITALY

What type of outlet does Italy use? Italy uses the standardized European outlets which are type C, F, and L, consisting of two or three round pins in a row of varying widths. Type C and L outlets have the same dimensions when it comes to the pin shape and width, however, type C has just two prongs while type L has a third grounding prong.

Where can I find an electronics store in Italy? You can find them in major tourist cities in neighborhood shops (often by the cash register), or at electronics stores like Unieuro, Euronics or Mediaworld. If you're renting a car in Italy, you can bring a charger for the car (like this one). If you lost your plug adapter or forgot to bring one, you can buy one here in Italy.

Do Europeans need a travel adapter for Italy? Yes! Europeans do not need a travel adapter or transformer when traveling to Italy. Most device plugs will work with the outlet types in Italy. However, some travelers may require an adapter for outlet Type L.

What kind of power outlets does Italy have? Italy uses a different outlet type than the US. The photo above shows a normal Italian power outlet, which operates at 220 volts and 50 cycles per second.

How to charge electronics in Italy? Italy's outlets are round and have either two or three holes. They look very different than the square shaped outlets in the United States, England, and other countries. You will need an adapter to charge your items in Italy. You can buy these online or from any electronics store.

What type of plug is used in Italy? Italy uses three main socket types: Type C, Type L, and Type F (Schuko plug). For most electric devices, a Type C (2-pin) adapter will work. This is the adapter I recommend for travelers, as it works for various devices like iPads, laptops, and phones.
