XILONG SCIENTIFIC ENERGY STORAGE

What is Xilong scientific? Xilong Scientific promotes the creation,research,and production of a variety of chemicals and materials,such as wet electronic chemicals,general chemical reagents,PCB chemical reagents,ultra-clean and high-purity chemical reagents,raw materials,food additives,and materials for photovoltaic electrodes and lithium batteries. Industry,

How to improve the commercialization of energy storage industry in China? The above problems have constrained the commercialization of energy storage industry in China. Therefore, we should take relevant measures, including reducing costs by all means, perfecting technical standards, establishing advanced benefits assessment system, and improving relevant incentive policies. 4.1. Reduce costs by all means

Does China's energy storage industry have a comprehensive study? However,because of the late start of China's energy storage industry,the comprehensive study for the whole industry is very few. We found a review which provided a relatively comprehensive analysis of the technical and economic issue of it. Compared with other studies,its research has a good comprehensiveness.

Is energy storage a key innovation field in China? In November 2014,the State Council of China issued the Strategic Action Plan for energy development (2014???2020),confirming energy storage as one of the 9 key innovation fieldsand 20 key innovation directions.

Why is energy storage industry in China a big problem? Judging from the present condition, cost problem is the main barrier. And the high performance and high security of the relative technology still need to be improved. Until 2020, energy storage industry in China may not be spread massively and the key point during this period is the technology research .

XILONG SCIENTIFIC ENERGY STORAGE

What is the White Book for energy storage industry in 2014? White book for energy storage industry in 2014. China Energy Storage Alliance 2014. China Electricity Council. The study on the development policy of energy storage industry. China Power Enterprise Management 3; 2015. p. 24???28. Global energy storage distribution: the US accounts for 40% and Japan accounts for 39%.
