

## XIN GU ENERGY STORAGE PROJECT STARTS CONSTRUCTION

Will China build a new energy storage system? Technicians inspect wind farm operations in Hinggan League, Inner Mongolia autonomous region, in May 2023. WANG ZHENG/FOR CHINA DAILY China has been stepping up construction of new energy storagein recent years to build a new power system in the country amid its green energy transition, said authority.

How many kilowatts are in China's new energy storage projects? [Photo/China Daily]The installed capacity of new energy storage projects that were put into operation during the first half of this year in China has reached 8.63 million kilowatts, equivalent to the total installed capacity of previous years in the country, according to the National Energy Administration (NEA).

Will China achieve full market-oriented development of new energy storage by 2030? The country has vowed to realize the full market-oriented development of new energy storage by 2030, as part of efforts to boost renewable power consumption while ensuring stable operation of the electric grid system, a statement released by the National Development and Reform Commission and the National Energy Administration said.

How energy storage power stations are being built? In terms of installed capacity,new energy storage power stations are now being built in a more centralized wayand large scale with longer storage duration period,said the administration.

How much money has China invested in energy storage projects? In terms of investment scale, the newly operated new energy storage projects have driven direct investment of more than 30 billion yuan (\$4.2 billion)based on the current market price, said Liu Yafang, an official with the administration, during a conference held in Beijing on Monday.

## XIN GU ENERGY STORAGE PROJECT STARTS CONSTRUCTION

Will China expand its energy storage capacity by 2025? China aims to further develop its new energy storage capacity, which is expected to advance from the initial stage of commercialization to large-scale development by 2025, with an installed capacity of more than 30 million kilowatts, regulators said.

In the first half of 2024, China has successfully completed eight significant long duration energy storage projects, marking substantial progress in the country's renewable energy and carbon reduction goals. 1. PetroChina's ???

On January 15, the 500MW+150MW/300MWh (energy storage) wind power project in Xinghe County, Ulangab City was connected to the grid at full capacity, which started on May 8, 2022. Under the influence of many ???
