Shore power technologies, also known as cold ironing, Onshore Power Supply (OPS) or Alternative Maritime Power (AMP), are the only solutions that cut emissions totally at berth. Shore power solutions enable the connection of ships in port to onshore power supplies that provide electricity for on-board services allowing diesel generators to be switched off.

In combination with innovation, Åland's aspiration is to become a pioneer in green energy in the Nordic countries. Wind power already accounts for 90% of Ålands electricity production. The move toward even greater production of renewable energy through large-scale solar power farms and offshore wind farms is already well underway.

The Åland Index, developed by partner bank Ålandsbanken, is used for impact calculations. Doconomy invites all banks and financial market participants to engage in global climate action via using the Åland Index Solutions platform of services, covering calculation, integration, communication and activation.
